

Vision Zero

The Implementation of Health and Safety at School Level

- With loss of lives & loss of the Nation's GDP per year involving accidents/fatalities in India, it is necessary to build a strong safety culture.
With seeds sown in the tender minds of young children so that these future leaders are well equipped with knowledge of safety & health.
- If a child develops good safety habits at a tender age, this learning remains throughout his/her life, translating to safe behaviour at the workplace, street & homes.
- Vision Zero can best be brought to the huge amount of self-employed unorganized workers through their children.
- The COVID-19 pandemic & recurrent natural calamities in India have brought into focus the importance of disaster & pandemic management, safety & health as well as social security. These topics shall now be included in school/college curriculum as decided by the Government of Odisha.

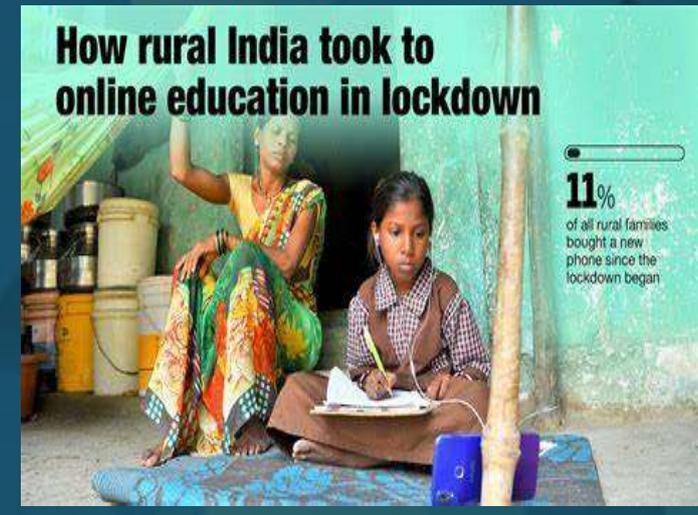

COVID-19 Effects on Children

1. Primary and upper primary schools have remained closed for over 500 days, Its human capital has been eroded by school closure.
2. 97% of parents in rural households want school reopening.
3. 26% of poorer students enrolled in higher quality private schools had to switch to lower quality schools.
4. 20% of urban and 14% of rural families said they had received no financial support.
5. 1,362 children in classes 1-8. School closure drove many students to alternatives like online education, videos or help from parents and friends.
6. 47% of urban and 28% of rural students were studying regularly, while 19% and 37% respectively did not study at all. Just 42% urban students and 48% of rural ones can read more than a few words.

COVID-19 Effects on Children

7. Only 8% of rural parents and 23% of urban ones felt their children had adequate access to online education.
8. Many children had no access to smart phones, data or understanding of how to use online facilities. Of those not studying regularly despite having smart phones, 43% of rural and 14% of urban students said they got no online material at all from their schools.
9. As many as 57% of urban and 65% of rural online users complained of connectivity problems, showing how weak the broadband infrastructure is.
10. Barely a quarter able to access online lessons (not a substitute for education).

Petition by IGFP to include OSH in the Indian School Syllabus

Introduction of a chapter on Occupational Safety & Health in School Curriculum

Dear Secretary, School Education Govt of India

May I remind you about IGFP continuous Efforts to request Competent Authority of Govt of India to include Occupational Safety and Health ,OSH in School Syllabus, particularly in Primary Classes in India.

This inclusion of OSH as a Subject in school curriculum has assumed most importance in the Pandemic situation the Country is facing now. Prevention which is key to any action involving Natural calamities like Corona virus can be imbibed in the children /students who in turn will play key role in influencing their Parents for A Safe Workplace and taking care of Health Social Security to ease the efforts of Government at Social Economic level

Infect IGFP has developed a Prevention Liner and Lessons Learnt during Lockdown which may substantiate our request to include OSH in school Syllabus at Primary Level, besides Life Long Learning (LLL) Technique through Toys developed by our supporter BGBAU Germany & SEWA Ahmadabad to take Safety Education to Children

I am forwarding herewith our mail sent to Hon HRD Minister with request to arrange a meeting to discuss the details which may help millions in our country and bring Paradigm Shift to our Message . We have A Presentation to the Proposal for display in the proposed meeting @ your convenience & time please.

Parents you

Expecting a positive response for which IGFP is available 24x7

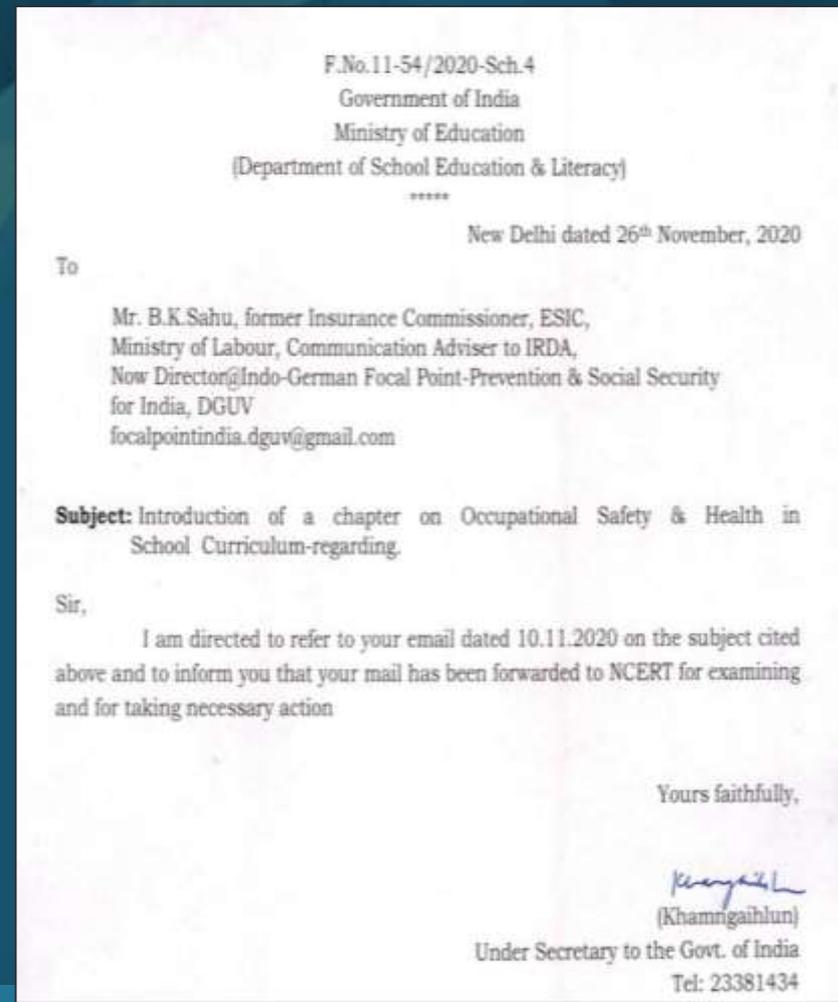

With cheers and Regards

B.K. Sahu

Former Insurance Commissioner, ESIC, MOL,

Now CEO/Director IGFP

Reply Letter from School Secretary on the petition by IGFP to include OSH in the Indian School Syllabus

Suggestions on School Syllabus

Life Long Learning Project

Developed by BG BAU, implemented by SEWA, promoted by IGFP

Objectives

- Promote learning on crucial safety practices through games and age-appropriate activities.
- Develop an atmosphere of preventive health and safety in kindergartens, schools and at home, in order to improve safety and health at work and in transportation.
- To show how engaging young children on safety and health issues can lead to long lasting habits and prevention of risks.
- Inculcate a sense of risk prevention and safety in young children, parents, educators, workers..

Life Long Learning Project - Games

Colouring & Activity book

Puzzle

Twist-table clock game

Cards

Board game
